Attached are the test results for the final space we were awaiting results for, the CTE room at SVEC. All repeat confirmation testing is now complete and results available.

We would greatly appreciate your ability to finalize your review of these documents as well as the QA information from the lab so that we can return these spaces to use as soon as possible.

Respectfully,

John Mannix
Assistant Superintendent, Operations

To: Fredrika Smith <smithf@monroe.wednet.edu>, John Mannix <mannixj@monroe.wednet.edu>, Karen Rosencrans <rosencransk@monroe.wednet.edu>

The results are back for the CTE room. We do not have any detectable PCB's.

Devlin,

The two air samples, field blank, and laboratory blank that were collected on Monday, March 13, 2017 are attached. No PCBs were detected in any of the samples.

I am still working to get the clarification as requested by EPA from ALS Global.

Thank you,

Ryan
